

# Switchblade

INTERNATIONAL

Company Profile

## The Company

Switchblade International is a dynamic UK based company providing a three hundred and sixty-degree approach to the equipment, weapon and ammunition needs of the modern world.

## The History

Switchblade International was established in 2009 with the aim of providing national and regional governments as well as private security companies with a supplier whose business model is built entirely around its customers' specialised equipment needs and providing a fast and reliable way of fulfilling them. Since then Switchblade International has become the UK's leading supplier to the sector.

*“...business model is built entirely around their customers' specialised equipment needs...”*

## The Mission

To work in partnership with its customers with the aim of providing the capacity and equipment with which to meet the full spectrum of challenges posed by the modern world.

To work with its customers to review their security equipment needs and thereafter provide a seamless service of supply and provisioning.

To facilitate the fast and safe delivery of ordnance and equipment, whilst maintaining the highest standards of administration. Switchblade International is fully licenced by the UK Government and gets all necessary approvals and permits for exports as required by UK Law.

*“...work in partnership with Governments  
and International organisations...”*

## The Approach

Each market and the challenge it offers is unique. In recognising this Switchblade International does not rely alone on its extensive past experience when working with customers to assess their needs. We treat each situation and each requirement as unique, determining the best solution through an evaluation based upon a stringent set of criteria.

*“... Switchblade International does not rely alone on its extensive past experience...”*

## The Experience

Switchblade International has developed particular expertise in Africa, the Middle East and Asia.

This experience encompasses a significant range of domestic and international solutions, including immediate PSC contract requirements, domestic and international counter-terrorism purchases and government supply needs.

What has brought the military, security and other agencies of these countries to Switchblade International, has been its ability to provide deadline focused problem free solutions. The clearest evidence that this approach works lies in the fact that since its inception and with more than 2000 completed deliveries chalked up, not a single one has been delivered later or incomplete.

*“...since its inception and with more than 2000 completed deliveries chalked up, not a single one has been delivered later or incomplete ...”*

## The Offering

Switchblade International deals in all forms of small arms, from pistols, to bolt action sniper and assault rifles, rockets, grenades and light to heavy machine guns in both NATO and Eastern Bloc styles and calibres. Able to source weapons from most manufacturers, Switchblade International however only acts as sole agents for those brands that it really believes to be the best in the field.

Switchblade International has one of the most comprehensive stocks of specialised weapons available and maintains a large inventory of most calibres of ammunition. These are ready for immediate sale or export to approved countries, subject to being granted the correct UK licences based upon EUC's provided by our clients.

*“...Switchblade acts as sole agents only for those brands that it really believes to be the best...”*

## The Brands

In choosing which brands to work with, Switchblade International has put together a portfolio of equipment covering every imaginable eventuality and requirement. That selection has been made based on the proven reliability of the products concerned across a range of applications and a spectrum of operational circumstances.

*“...a portfolio of equipment covering every imaginable eventuality and requirement...”*

## Products
